**1/06/2010**

**G'day Danny,**

**I thought I would put pen to paper and let you know how we are going with the new Ally Master.**

**We have just come back from a three week holiday around the Northern Rivers of NSW. While there we were able to try the Trailer out on some Dusty Corragated Roads. It is a pleasure to let you know that No Dust whatsoever got inside the Trailer and at times it was that thick that I couldn't see out of the rear window of the Prado. As for the Corragations, We hardly knew they were there as the Trailer towed beautifully.**

**We also had a chance to weigh the trailer when fully loaded over a Weigh Bridge. With all our gear (120litres of water, far to many Tools, a Roll jack, Two fridges, Three cartons of Alcohol and "Lots of Clothes") we weighed in at 1.20T. I have to admit that we thought it would weigh a lot more. We estimated that this was less as the old CT we had previously and with yours we certainly get a lot more for the dollar.**

**All the "extras" worked well - hot water, air suspension, solar charging. etc We were also pleased that the insulation worked a treat with the temperature at Guyra down to 4deg outside, the inside temp was a nice 10deg.**

**Many thanks for the trailer and after this trip we feel confident to tackle some of the more remote parts of Aus. in the near future.**

**Thanks**

**ROB & DIANNE NORRIS**
